(54) Title: ARRANGEMENT INTRODUCED IN AN ELECTRONIC DEVICE FOR THE IDENTIFICATION OF APPAREL
GOODS WITHIN PRODUCTION CHAIN

(57) Abstract: Arrangement introduced in an electronic device for the identification of apparel articles within the production, through which it is possible to identify apparel articles concerning its originality, with the purpose of establishing a fully faithful and efficient way for said control; the model discloses two constructions or proposals, with the first one consisting of a substantially cylindrical body of button (1) which is nailed to a circular base (2); to form a circular placement (4) to receive the (previously encapsulated) assembly formed by chip (6) and antenna (5), with such encapsulation resulting in an opening to concentrically 10 receive the plastic plug (7), and said plug projecting a lower circular flap located in a hole provided on the base of the button, configuring a small opening; finally, the locking pin (12) is nailed to the button body; in the second construction, the basic difference to the previous proposal is the elimination of the plastic plug (7), but providing the button body with a composition of engineering plastic; further features are maintained, such as the 15 previous encapsulation of the chip (6) plus antenna (5) assembly.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T"

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X"

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y"

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
